

BEYOND ANALYSIS

ROUND 2

Conducted by
Techniche, IIT Guwahati

In round 2, the top participants are given the opportunity to present a summary of their approach and outcomes to the judges.

Using the following format the participants would end up with **6-10 voice embedded slides + title.**

1. Identify your team (team name and names of members) on a title slide.
2. Problem statement: A brief of the problem at hand and the dataset provided. Should include quality metrics used to measure performance. (1- 2 slides)
3. Methods explored: Will typically include data preparation/ featurization, and then the learning algorithms tried, and possibly visualisation or interaction to explore the results. Any significant patterns seen in the data can be included. (2 slides)
4. The tools used, and a rationale for their use. Can cover data preparation, learning, visualisation, performance measurement and so on. (1- 2 slides)
5. Results: The nature of final predictions made and unexpected challenges faced. (1-2 slides)
6. Lessons learned and future prospects. (1-2 slides)

This is just to give a brief idea of what all has to be included, the team need not adhere to it and can be creative in presenting their approaches! Participants are requested to upload their presentations and the csv file containing the predictions on Google Drive and share it through the form link by **5th September, 11:59pm.**

[Here is the Form link](#)

NOTE

- Make sure to give access to the Google Drive link shared (keep it open for everyone with the link)
- Submit the prediction file that is considered for ranking in the private leaderboard
- Failure to do so can lead to disqualification
